

## List of Tables

Table 1 Terrain with non-rectangular obstacle applied with HPA* pathfinding algorithm	6
Table 2 Performance of HPA* on static obstacles	8
Table 3 Performance of HPA* on dynamic obstacles	8
Table 4 10% blocked node in grid map	20
Table 5 50% blocked node in grid map	21
Table 6 Terrain with non-rectangular obstacle applied with navmesh on HPA* pathfinding algorithm	25
Table 7 Unit traverse different transitions	28

## List of Figures

Figure 1. Terrain with non-rectangular obstacle	5
Figure 2. HPA* applied on terrain from figure 1.1.1	6
Figure 3. Interaction of the unit to dynamic obstacle (different unit) on HPA*	7
Figure 4. Different placement of transitions on the same entrance	9
Figure 5. Interaction of HPA* algorithm to non-rectangular obstacles.	25
Figure 6. Interaction of proposed algorithm to non-rectangular obstacle	25
Figure 7. Unit interaction to dynamic obstacles on HPA*	27
Figure 8. Unit interaction to dynamic obstacle on proposed algorithm	27
Figure 9 Unit circles around the non-rectangular obstacle	33
Figure 10 Unit passes through the area between the non-rectangular obstacle	33
Figure 11 Unit stops when encountering dynamic obstacle	34
Figure 12 Unit passes towards a dynamic obstacle	34
